ARNETTE

SUSTAINABLE COLLECTION

Made with  using sustainable materials

WHY OUR PRODUCTS ARE SUSTAINABLE?

BIO-BASED PLASTIC

All new ARNETTE regular injected styles are made of GRILAMID BTR 600 LS, an innovative material defined by international standards as "Bio-based", 56% of its composition is derived from renewable sources (Castor oil), making it noteworthy for its reduced impact on the environment.

BIO-ACETATE

The frames from the ARNETTE Bio-Acetate Collection are composed by bio-based materials coming from renewable raw materials from 50 up to 70% (flake + plasticizer). The frames maintain the same aesthetical features of the traditional acetate, and when touched, the feel is a bit more silky-warm.

BIO LENSES

Bio lenses are set on all styles from the ARNETTE Bio-Acetate Collection and they are made of TR XE 4205, which is a polyamide with 39% of base-molecules (monomers) derived from Castor Oil. The total emission of climate-damaging gases during the whole manufacturing process of the polymer and its precursors can be reduced by up to $\frac{3}{4}$ depending on the product. Bio-lenses maintains the same features as traditional lenses.

WHY OUR PACKAGING IS SUSTAINABLE?

SUN STYLES

All sun styles come with a dedicated pouch made of 78% recycled polyamide and with a 25% recycled ABS stopper. The box is also completely recyclable.

OPTICAL STYLES

All optical styles will be delivered with a new case whose plastic parts are made from 60% recycled ABS. The case contains a microfiber cloth made of 78% of recycled polyamide.

STORYTELLING CARD

Today all sustainable frames come with a storytelling card where all information about % of renewable or recycled materials used on our products are claimed. From 2021, we will report all information on a digital platform linked to a QR Code on the packaging.

the 1990s, the number of people in the UK who are aged 65 and over has increased from 10.5 million to 13.5 million (13.5% of the population).

There are a number of reasons why the number of people aged 65 and over has increased. One of the main reasons is that people are living longer. The life expectancy at birth in the UK is now 78 years for men and 82 years for women. This is a significant increase from the 1950s, when life expectancy at birth was 71 years for men and 76 years for women.

Another reason why the number of people aged 65 and over has increased is that people are having children later in life. This means that there are more people aged 65 and over who have children who are still alive.

There are a number of implications of the increase in the number of people aged 65 and over. One of the main implications is that there will be a need for more care and support for older people.

There are a number of ways in which the government can meet this need. One way is to increase the number of care homes. Another way is to increase the number of people working in the care sector.

There are a number of other ways in which the government can meet this need. One way is to increase the number of people who are aged 65 and over who are able to live independently.

There are a number of ways in which the government can increase the number of people who are able to live independently. One way is to increase the number of people who are able to afford to live in their own homes.

There are a number of ways in which the government can increase the number of people who are able to afford to live in their own homes. One way is to increase the number of people who are able to afford to buy a home.

There are a number of ways in which the government can increase the number of people who are able to afford to buy a home. One way is to increase the number of people who are able to afford to pay a mortgage.

There are a number of ways in which the government can increase the number of people who are able to afford to pay a mortgage. One way is to increase the number of people who are able to afford to pay a deposit.

There are a number of ways in which the government can increase the number of people who are able to afford to pay a deposit. One way is to increase the number of people who are able to afford to pay a deposit.

There are a number of ways in which the government can increase the number of people who are able to afford to pay a deposit. One way is to increase the number of people who are able to afford to pay a deposit.

There are a number of ways in which the government can increase the number of people who are able to afford to pay a deposit. One way is to increase the number of people who are able to afford to pay a deposit.
