ALAIN MIKLI PRESENTS THE 2022 FALL/WINTER COLLECTION

The 2022 Fall/Winter collection is an ode to freedom and the artistic interpretation of geometric shapes, lines and colors: in a word, the quintessence of the Mikli spirit.

Ranging from simple and minimalist lines to more audacious and playful expressions, the models of the collection respond to the needs of the optical and sunglasses world, reinterpreting the most traditional aesthetic canons. Bold, high impact, designed to be seen, but at the same time extremely comfortable: these are the characteristics of the 2022 Fall/Winter collection.

Combining elegance and artistic originality in typical Mikli style, the glasses are designed for those that want to stand out from the crowd: the creative flair that catches the eye at first glance can also be seen in the details of each model. The striking colors showcase the materials, the bonding techniques and the other processes carried out with consummate artisanship.

The six new models of the Alain Mikli 2022 Fall/Winter collection are divided into three intriguing themes: Classic Cool, Lines and Back to the 80's.

Classic Cool embodies the brand's DNA, consisting of two bold and contemporary classic silhouettes in a wonderful range of colors on a milled acetate front piece. The styles are innovative and high-impact, adding new vibrancy and freshness to these looks.

The Lines theme revisits typical Mikli designs, presenting two fun and dynamic acetate models which play around with lines and colors using complex friction techniques that exalt the prismatic rims of the frames.

Last but not least, Back to the 80's is a celebration of the history of the brand which looks back at its archive to reinterpret some of its most iconic models. This theme consists of an optical and a sunglasses model which, once again, successfully combine bold colors, lines and remarkable processing techniques. For the first time Mikli also expands its range with the addition of an accessory to the collection: in fact, the three models in this theme are joined by a black acetate chain with a Black & White Damier detail.

Finally, the 2022 Fall/Winter collection presents the public with two new and exclusive families of acetate, Savana and Cyberpunk, in two and three different colors respectively. Both motifs are extremely creative and audacious and perfectly reflective of the Mikli spirit, becoming an integral part of the new creations.
