

 **COSTA**® SPRING 2022

BORN ON THE WATER®

It's true now, and it was true then: We'll do anything to stay on the water longer. In 1983, a group of anglers created Costa Sunglasses to stand up to the harsh light, unforgiving salt and rough conditions of a day at sea. The gear they made was up to the task, and it's been on the water ever since, inspiring all of us to See What's Out There®.

BUILT BY HAND

The vast majority of Costas are built by hand in the USA. And we know that people who wear our sunglasses like to get after it, so when things happen to them that are not covered by one of our Limited Warranties, Costa has options to help get you back on the water.*

*See our website for terms, conditions and associated fees with our Limited Warranties and our repair program.

BEYOND POLARIZED®

Most polarized lenses eliminate glare by filtering reflective light. But Costa's 580® lenses go further, filtering the perfect amount of yellow light and HEV blue light while enhancing reds, blues and greens. The result: less haze, less blur, greater contrast and greater clarity. Available in glass (580G) and a lightweight, impact-resistant polycarbonate (580P), it's like seeing in high definition.

LOOKING AFTER WHAT WE LOVE

The more time we spend out on the water, the more inspired we are to protect it and its inhabitants. From our Kick Plastic® initiative to our Indifly Foundation, we devote considerable time and resources to conservation efforts that raise awareness, protect fisheries and enrich water-based communities.

LENSES

We want you to See What's Out There®. That's what inspired us to bring you the first color-enhancing all-polarized glass lens. It's what keeps us pushing the sunglass industry forward with technology that provides 100% UV protection and goes beyond polarization to provide the ultimate in light management with our 580® lenses.

POLARIZATION – NOT ALL POLARIZED LENSES ARE CREATED EQUAL

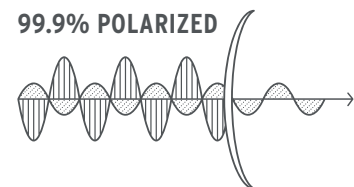

Polarized lenses are essential for anyone who spends time outdoors – especially on the water. But not all polarized sunglasses are created equal.

COSTA LENSES HAVE 99.9% POLARIZED EFFICIENCY*

- + Utilizes the best polarized technology available
- + Provides comfort by eliminating reflective glare
- * With the exception of our specialty Sunrise Silver lens.

COSTA SELLS ONLY POLARIZED SUNGLASSES

- + Because we believe filtering reflective glare is essential for anyone on the water or outdoors, we sell only polarized sunglasses

BEYOND POLARIZED® - COSTA 580® TECHNOLOGY

Costa 580 lenses were designed by in-house light spectrum experts to enhance colors, because other sunglass lenses fell short. The lens's patented technology manages light by:

FILTERING OUT YELLOW LIGHT

- + For enhanced color, sharper contrast and higher definition

ENHANCING REDS, GREENS & BLUES

- + Filtering yellow light at 580 nanometers on the visible light spectrum boosts the amounts of reds, greens and blues naturally, enhancing colors and contrast

ABSORBING HIGH-ENERGY VISIBLE (HEV) BLUE LIGHT*

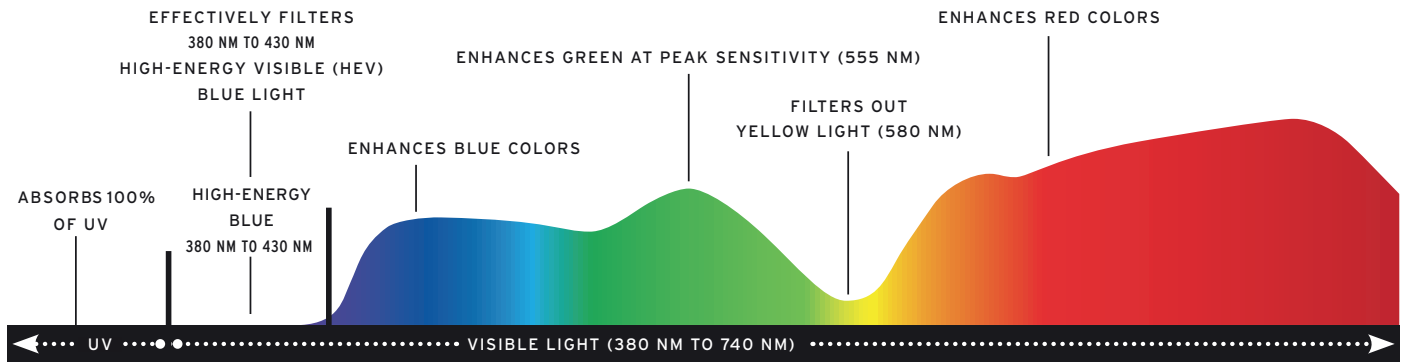

- + In addition to 100% protection from UV light, 580 technology also absorbs HEV blue light

* HEV blue light refers to the 380-430 nanometer range of the visible light spectrum.

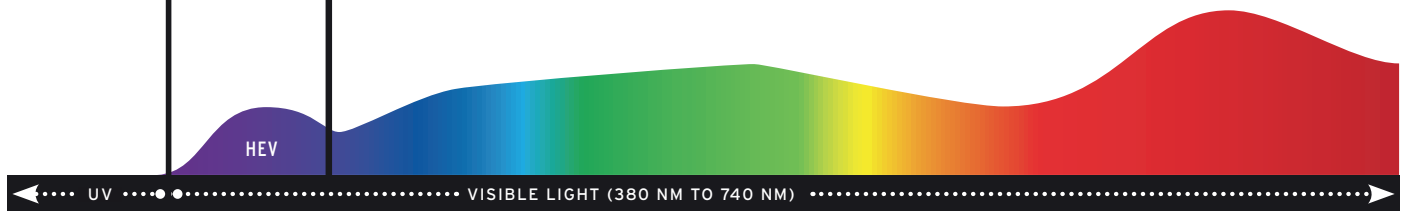

COSTA 580[®]

COSTA 580[®] POLARIZED LENSES

OTHER POLARIZED LENSES

* HEV blue light refers to the 380-430 nanometer range of the visible light spectrum.

** Visible light refers to 380nm to 740nm on the visible light spectrum.

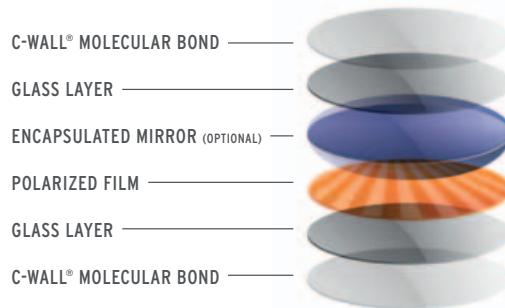

THE MOST ADVANCED LENS OPTIONS - GLASS AND POLYCARBONATE

Costa utilizes the most advanced lens technology. Ask your customers how they plan to use their sunglasses to ensure that you recommend the right lens option for them.

LIGHTWAVE® GLASS SUPERIOR CLARITY & ULTRA SCRATCH-RESISTANT

COSTA 580G

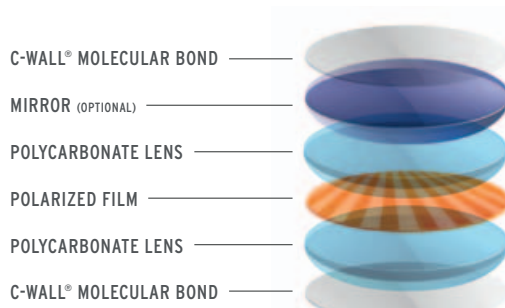

- + Glass provides the best clarity in material
- + Encapsulated mirrors (between layers of glass) are scratch-proof

POLYCARBONATE LIGHTWEIGHT, IMPACT- & SCRATCH-RESISTANT

COSTA 580P

- + Polycarbonate & Polyurethane are our lightest and most durable lens material options
- + C-WALL® molecular bond

MIRRORED LENSES – NOT JUST GOOD-LOOKING

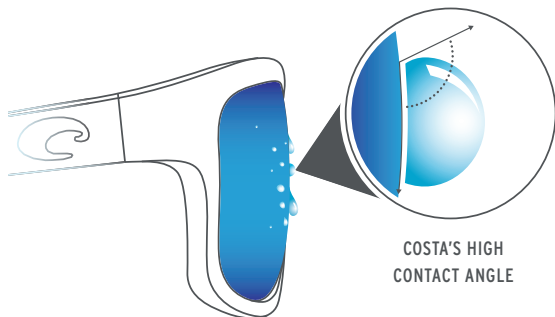

Our mirrors are more than aesthetic; they're a necessity in harsh sunlight. Made through a high-tech ion beam deposition process, these multilayered thin film coatings make for scratch-resistant mirrors.

- + Reflect light away from the eye
- + Deliver incredible contrast
- + Scratch-resistant
- + Available in blue, green, sunrise silver, copper silver and gray silver

C-WALL® – SCRATCH AND SMUDGE RESISTANT

The C-Wall is a molecular bond on our lenses to provide a scratch- and smudge-resistant barrier that repels sweat, water and oils for easier cleaning to help keep your vision clear.

Contact Angle: Fluids bead off the lens at a high contact point, allowing the droplets to roll off the lens.

CHOOSING A LENS COLOR

Determine Where Your Customer Spends Their Time.

Costa lenses were made with changing light conditions in mind. To get the most out of them, it's important to choose the right color. We offer seven lens colors in multiple lens technologies designed for everything from dawn to extremely bright light with blinding glare. Consider where your customer might spend their time to fit them with the best lens.

* HEV blue light refers to the 380-430 nanometer range of the visible light spectrum.

Brightest Light

GRAY (OGGLP AND OGP)

Everyday base for the harshest sun conditions

BLUE MIRROR (OBMGLP AND OBMP)

Open ocean and offshore fishing

GRAY SILVER MIRROR (OSGGLP AND OSGP)

Offshore fishing, open-water sports

Variable Light

COPPER (OCGLP AND OCP)

Everyday base for changing light conditions

GREEN MIRROR (OGMGLP AND OGMP)

Inshore / sight fishing

COPPER SILVER MIRROR (OSCGLP AND OSCP)

Inshore / sight fishing

Low Light

SUNRISE SILVER MIRROR* (OSSGLP AND OSSP)

Highest light transmission with maximum protection, ideal for low-light conditions (dusk, dawn, cloudy days)

* These lenses are not suitable for driving

COSTA Rx[®]

Our prescription lenses offer the same performance you've come to expect from our regular 580 lenses. Throughout the design and processing of our 580P and 580G Rx lenses, the functionality of single-vision, bifocal and progressive prescriptions has been integral. Our Rx lenses are etched for authenticity and available in most of our frames from authorized Costa prescription dealers.

WAYPOINT™ DIGITAL TECHNOLOGY

Over the years, we've invested heavily in our state-of-the-art processing lab to specialize in digital precision.

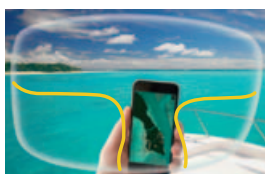

- + Costa Waypoint digital technology enhances the field of view by minimizing the peripheral blur common with wrap sunwear.
- + Waypoint lenses are customized for frame and vision needs.
- + All Waypoint orders include compensated prescription values to ensure amazing visual acuity for wrap sunglasses with high base curves.

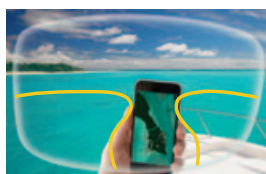

COSTA PROGRESSIVE LENSES

Costa now has two progressive lens designs to choose from:

- + Costa C-SCAPE[®] design was developed with top sportfishing pros and lens designers for immediate adaptation, enhanced viewing fields and minimal peripheral blurring.
- + Varilux[®] Stylistic™ design is available in Costa wrap frames for those patients with greater demand for a wider near field of vision.

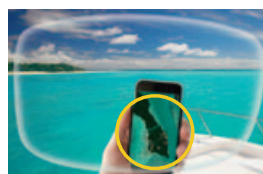

Costa C-SCAPE Progressive Lenses

Varilux[®] Stylistic™ Progressive Lenses

COSTA C-SCAPE[®] BLENDED BIFOCALS

We introduced the first backside round segment bifocal (22mm) with our Waypoint digitally compensated prescription specifically designed for wrap sunwear. C-SCAPE bifocals are perfect for the mature wearer who wants simple magnification for close-up tasks like reading outdoors or tying a fly. Our Waypoint technology ensures exceptional distance viewing fields.

Costa C-SCAPE Bifocals

FITTING RECOMMENDATIONS

To ensure that your patients get the most out of our digitally customized lenses, we recommend the following:

FITTING HEIGHTS			
PD (All Designs) MONOCULAR	Waypoint Single Vision	C-SCAPE PAL Varilux Stylistic	C-SCAPE Blended Bifocal
	PUPIL CENTER	PUPIL CENTER	PUPIL CENTER

Illuminating the back of the lens with the Costa Seg Snake lets you easily see the pupil and eyelid.

Rx product limited warranties: 2-year lens and frame manufacturer's warranty; defect warranty; 1-year scratch warranty. See website for terms, conditions and associated fees.

LASER ETCHED FOR AUTHENTICITY

We etch our logo onto every Rx lens and provide a Costa authenticity card for each order so your patients know they're getting the real deal.

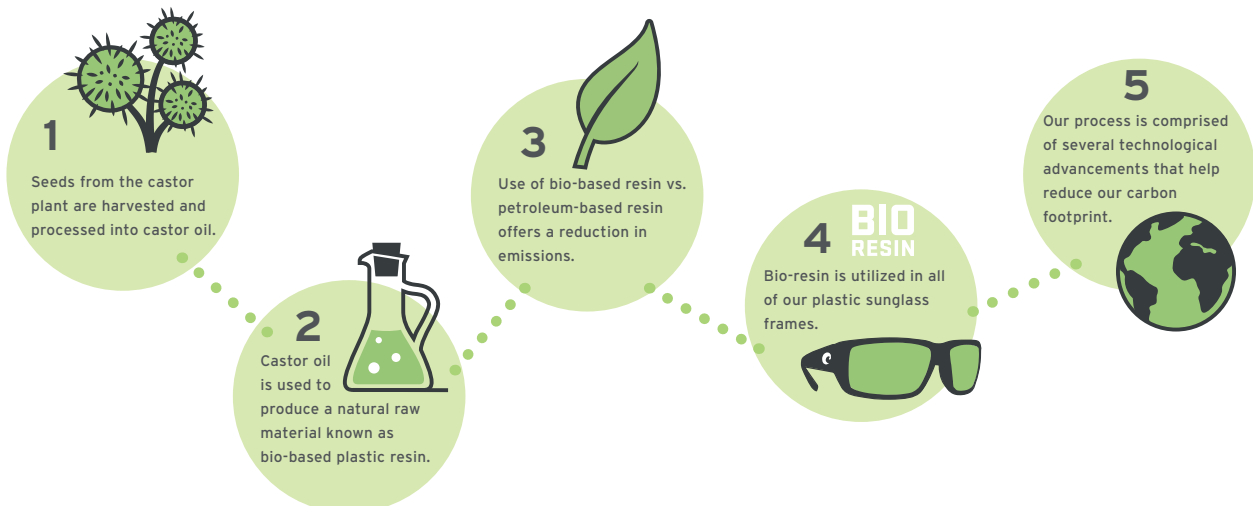

FRAMES

Customers can choose a frame based on color, materials, durability, lightness, cost and uniqueness. Each frame offers its own performance advantages and style features, for eyewear that fits every occasion.

PROTECTING WHAT'S OUT THERE – THE BIO-RESIN RAW MATERIAL PROCESS

We recognize that every pair of sunglasses we make has an environmental and social footprint. This means that we search for the most durable, innovative and water-friendly materials available for our sunglasses. Sourcing materials that are able to withstand salt, sun and heat is challenging. In 2016, our product team introduced a new, high-performing material that used resin from the castor bean plant. Now, instead of using nylon sourced 100% from petrochemicals, all our nylon frames are made with a formula we call Bio-Resin™ that is partially derived from the plant. These frames are durable and lightweight, and hold their shape under harsh conditions. Frames that use our Bio-Resin™ have a smaller carbon footprint than traditional frame materials, and because it is sourced from a plant, contributes to carbon offset. Costa is an industry leader in converting our entire nylon frame line from traditional petrochemical plastic to include Bio-Resin™.

THE **BIO RESIN** RAW MATERIAL PROCESS

FRAME OPTIONS FOR EVERY NEED

CO-INJECTED BIO-RESIN FRAMES

Our nylon frames are tough and durable, with more color options manufactured using the bio-resin process. TR-90 nylon is a premier material for sports and performance frames, as it is resistant to heat and cold. Though it is flexible, it is still durable. Nylon is easily molded into wraparounds and other shapes.

ACETATES

Best for when you're not active, acetate has a warm, luxurious feel and allows for very rich color layering, which creates vibrant, unique patterns. Made from tree pulp, acetate is naturally hypoallergenic and can be adjusted for your best fit. Acetate is special because it molds to your face over time, giving it that fitted suit, worn-in jeans, leather sandals feel.

METAL FRAMES

Metal frames provide a different look and feel. We use only the best in metals – marine-grade, corrosion-resistant Monel® and lightweight, hypoallergenic titanium.

COMBINATION FRAMES

If mixing it up is your thing, we combine the best of bio-based resin and acetate with our corrosion-resistant metals. The combination of materials also allows for more style variations.

RIMLESS FRAMES

Rimless frames are feather-light because there is simply less nylon material sitting on your face. They're generally more comfortable, more streamlined and perfect for a variety of sports.

NETPLUS™ RECYCLED FISHING NETS

We partnered with Bureo®, an innovative organization that works with Chilean fishermen to recycle fishing nets, tracing the resulting NetPlus™ material through the recycling process where the nets are cleaned and pelletized before being turned into The Untangled™ Collection frames.

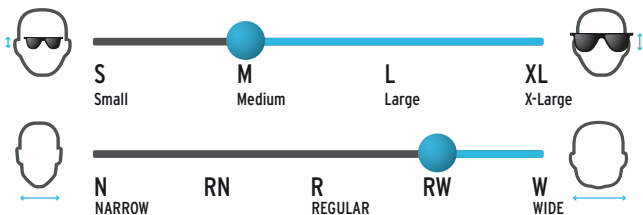

COSTA SIZE AND FIT

The Costa sunglasses 'fit' guide is a range from Narrow, Regular to Wide (with most people choosing Regular). Fit is a combination of both the size of the sunglasses and the features of the frame, together. The features of our sunglasses influence the way the sunglasses fit, like the hinges and temple construction.

COSTA SIZE AND FIT GUIDE

Size: The **size** of the **lens** on the front of the **face** – brow to cheek

Fit: The **fit** of the **frame** on your **head** – temple to temple

The fit also takes into consideration the flexibility of the frame material and hinge type.

SIZE	S	M	L	XL	
FIT	N	NR	R	RW	W

DURABLE AND LIGHTWEIGHT FRAME FEATURES

SUNGLASSES SHOWN: PAWLEYS – ROSE TORTOISE, COPPER, 580P PW 201

A) CO-INJECTED BIO-RESIN

Costa's co-injected Bio-Resin frame material is both tough and durable, while offering a comfortable fit.

✓ GREAT FIT ✓ AMAZING COMFORT

B) CORROSION-RESISTANT MONEL® METAL

Monel's® super-tough, corrosion-resistant alloy is often used in marine applications. If you are on the water, Monel® stands up to the challenge.

✓ GREAT ON THE WATER ✓ CORROSION-RESISTANT

C) HYDROLITE® RUBBER

Hydrolite® is Costa's hypoallergenic rubber that helps prevent slippage. We use Hydrolite® rubber on comfort spots such as nose pads and temples.

✓ PREVENTS SLIPPAGE ✓ HYPOALLERGENIC

D) TITANIUM

Titanium is as strong as steel but lighter in weight, making these frames perfect for everyday activities. Titanium is often used in prosthetics because it is hypoallergenic and corrosion-resistant.

✓ PERFECT FOR EVERYDAY ✓ HYPOALLERGENIC ✓ CORROSION-RESISTANT

E) BETA TITANIUM

Beta titanium is a hypoallergenic titanium alloy made by blending titanium with other metals to create a noncorrosive, flexible and lightweight frame material. It is extremely durable and strong, but bends, reducing damage and broken frames.

✓ HYPOALLERGENIC ✓ STRONG BUT FLEXIBLE

SUNGLASSES SHOWN: HELO – MATTE BLACK, GREEN MIRROR, 580P HLO 11

SELECT CORE FRAME FEATURES

A) VENTILATION

- + Ventilation ducting allows airflow through the end piece of the frame, which helps to keep you cool, reduces lens fogging, and works in conjunction with the sweat management temple channels.**
- + Nose pad ventilation also available on select core performance frames.

A) VENTILATION

B) SWEAT MANAGEMENT

- + Channels run the length of the temple that enable airflow from the vents to cool, wick away sweat and moisture, and drain through the openings on the temple tips.
- + Thinned-out inner bottom eyewire tucks closely into the back surface of the lens, which allows sweat and moisture to drain down the back surface of the lens and off the bottom of the frame.
- Textured Hydrolite® nose pads and temples provide a secure fit and all-day comfort.

B) SWEAT MANAGEMENT

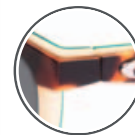

* Patent pending

TRI-FUSION – STYLE MEETS UNCOMPROMISING DURABILITY

- + Trilateral and bilateral fusion frames are heat-, chemical- and break-resistant.
- + They are lighter than the typical acetate frame.

- + Original bilateral and trilateral styles are created by bonding together two or three distinct colors into one frame.
- + Each layer is composed of solid color. The result is a durable frame with chip-proof color.
- + We offer multiple unique color combinations in both bilateral and trilateral styles.

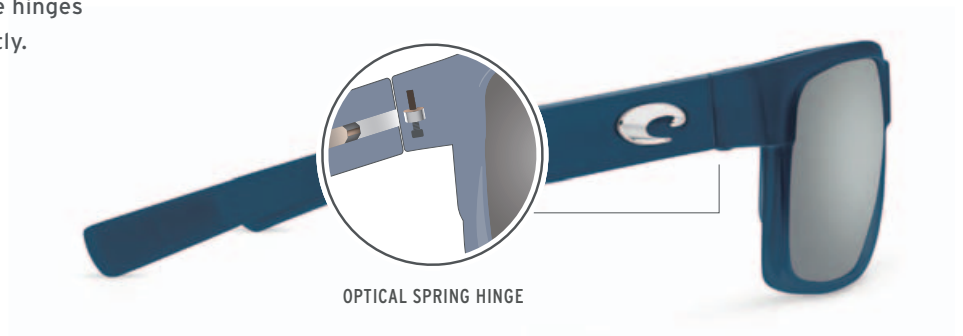

Unique color combinations stay true with solid color Bio-Resin, not paint.

QUALITY HINGES – KEEP THEIR SHAPE AND FIT PERFECTLY

Our corrosion-resistant, flexible hinges keep their shape and fit perfectly. They come in six types:

- + Integral
- + Optical spring
- + Five-barrel optical
- + Snap hinge
- + VDACS*
- + Monoblock five barrel

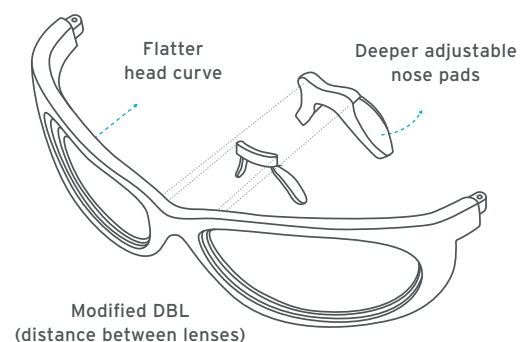

OMNIFIT – ONE SIZE DOES NOT FIT ALL

We've adjusted several of our top-selling frames to create a more comfortable and secure fit for people with:

- + Higher cheekbones
- + Longer eyelashes
- + And/or flatter noses

Omnifit encompasses our Asian Fit and Asian Friendly options—all still available in our 580® lenses.

* Patent pending

NEW SPRING 2022-SUN

6S9104 LIDO

With a focus on style and performance inspired by the vibes of the Pacific shores, this frame is ready for anything the water sends your way. Lido comes with top and side shields to help keep the light out, and Hydrolite® nose pads and temple tips to help you bring fish in. From east to west, for watching waves or riding them, Lido's there for the adventure.

6S9034 DIEGO

Our most advanced sport performance sunglasses yet. Diego features an innovative and patented vented spring hinge system to maximize airflow and enhance fit, plus sweat management channels that wick away moisture to cool and ensure all day comfort. Diego includes flexible, keep-ready temple tips, and top and side shield details to reduce light leak. Paired with coloring-enhancing, polarized 580® lenses, Diego is the next evolution in performance. With a name inspired by San Diego, one of our favorite places to fish, Diego will stop at nothing to help keep you out on the water longer, whether you're chasing yellowtail or the mighty bluefin.

6S9079 FANTAIL PRO

Anglers know as well as anyone—the best can always get better. We’ve taken that sentiment to heart with the new Costa Fantail PRO. The slimmed-down brother of the Blackfin PRO also boasts all the newest Costa PRO Series tech: a vented and fully-adjustable nose pad for a customizable fit; sweat channels and eyewire drains to keep your vision clear ; side shields, hooding, new stickier Hydrolite® and metal keeper slots help to keep your frames on your face and the sweat and sun out of your eyes.

THE UNTANGLED COLLECTION

When you look through a pair of Costa Untangled sunglasses, you share our vision for healthy oceans. Discarded fishing nets are the most harmful form of plastic pollution in our oceans. But, in partnership with Bureo and Chilean fishermen, we're changing that. Made of either 97% or 100% recycled fishing nets, our Untangled collection of recycled frames now comes in new colors, and performance styles that are as good for fishing as they are for the ocean.

6S9083 ANTILLE

Named after the 1,500-mile Caribbean island chain, the Antille frame keeps its finger on the life pulse of the ocean. With a frame made from 97% recycled fishing nets, Antille is a great hybrid performance frame style with vented nose pads and additional coverage for your eyes, so they can spot the next island, reef or siesta spot, making it as good on the water as it is for it.

6S9030 BAFFIN

Sharp angles and masculine styling best describe the Baffin. Named for the cold water current that ushers discarded fishing nets across marine ecosystems, Baffin is marked by a unique tumbled finish and includes textured detailing on the outer temples and interior rubber temple grips for comfort + performance. These frames are part of The Untangled™ Collection made from Bureo® NetPlus™ and are 100% traceable and 100% recycled fishing nets.

6S9028 CALDERA

Born On The Water and named after a Central Chilean seaport, the Caldera features a softly tumbled finish, elegant curves and uniquely textured temples. Nets that were once used to entangle fish, now protect your eyes, traveling full-circle to produce a positive impact on our planet. These frames are part of The Untangled™ Collection made from Bureo® NetPlus™ and are 100% traceable and 100% recycled fishing nets.

6S9084 CALETA

Taking its name from the small coves of Chile, the fluid lines and feminine shape of Caleta make it the perfect frame for the waterwoman in all of us. Wide, keeper-ready temples help reduce light leak and add a bold bit of style out on the water. More importantly, Caleta is made from 97% recycled fishing nets for frames that perform as good as they make you feel while wearing them.

6S9086 PARGO

Pargo is the little brother to Santiago, but it doesn't need any help when it comes to fighting fish. Also called the Dog Snapper for their giant canine teeth and nasty attitude, Pargo rules the reefs. This frame is made from 97% recycled fishing nets with 3% performance additive for increased durability and performance on the water. With hooding and side shields, keeper-ready temples and Hydrolite® rubber, Pargo shows it's not the size of the dog in the fight but the size of the fight in the angler hooked up to the Dog Snapper.

6S9085 SANTIAGO

The Untangled frame style with the most coverage and “fishability” takes its name from Chile’s capital. Hooding and side shields help keep your eyes free from light leak and focused on the water. Keeper-ready temples and Hydrolite® rubber grips keep you fishing no matter how rough it gets out there. And to ensure a future full of fish for ours and future generations, Santiago is made from 97% recycled fishing nets. The other 3% is a performance additive that will help you catch 100% of the fish you chase. Santiago is as good for fishing as it is for our oceans.

DEL MAR[®] COLLECTION

Sunglasses filled with fresh designs collected from our watery world. These acetate frames feature colors inspired by the abalone shells, golden sands and deep blue waves that fuel adventures on the water. And since they all come with 580 lenses, they're a great new way to See What's Out There[®].

6S2011 APALACH

Known for its oysters, pristine white sand beaches and maritime culture, Apalachicola is full of old-world charm in the heart of the Florida Panhandle. With sleek lines, a flat front and Costa 580G lenses, Apalach is a masculine, casual acetate frame that will enhance your ocean views.

SPECIALITY

6S9083A ANTILLE OMNIFIT

Named after the 1,500-mile Caribbean island chain, the Antille frame keeps its finger on the life pulse of the ocean. With a frame made from 97% recycled fishing nets, Antille is a great hybrid performance frame style with vented nose pads and additional coverage for your eyes, so they can spot the next island, reef or siesta spot, making it as good on the water as it is for it.

6S9084A CALETA OMNIFIT

Taking its name from the small coves of Chile, the fluid lines and feminine shape of Caleta make it the perfect frame for the waterwoman in all of us. Wide, keeper-ready temples help reduce light leak and add a bold bit of style out on the water. More importantly, Caleta is made from 97% recycled fishing nets for frames that perform as good as they make you feel while wearing them.

6S8007 OCR210

Our Ocean Ridge collection is designed for those who move, featuring lightweight, great-fitting active frames, made from our Bio-Resin™ nylon. The material is strong, allowing the frames to hold their shape in heat and cold weather, and our trifusion frame technology results in unique color combinations.

- Designed for those on the move
- Lightweight and comfortable
- Durable frames hold their shape

6A9049V PAUNCH RX

Our latest beach frame heads to the white sands, clear waters and legendary surfing of Bocas Del Toro in Panama. This Bio-Resin™ frame pairs perfectly with textured Hydrolite® rubber nose pads to keep these on-trend frames comfortable on your face. Interior sculpting details draw you out onto the water, just like the boats they're inspired by. Enter the barrel of the beast with Paunch.

6A4002V PELI RX

Short for pelican and inspired by life on the water, the Costa Peli is made for adventure. This classic pilot shape features upgraded technical features and made-to-last quality, blending performance and good looks. The boat-hull inspired textures draw from the coastlands that inspire all of us to See What's Out There.

6A2002V SULLIVAN RX

Those who have been to Sullivan's Island know how to unwind. So naturally, Sullivan was designed with a slow-down, kick-back kind of style that still manages to grab attention along with its water-inspired acetate designs. Hit the beach, look out over the waves and leave the tension to your fishing line.

Intentional blank page

Costas are made for those who need water to breathe

—the anglers, surfers, swimmers and explorers who have inspired us for more than 35 years to grow our tribe and push sunglass technology forward. It's a journey we couldn't make without you, and we're proud to have you on our next adventure. Let's fill our days and see where the new year takes us.

While the water has always guided our way, it's the company we've kept that we have to thank for where we are today.

To our customers, reps, retail sales associates, employees, pros, partners and loyal fans, and everyone who has experienced the beauty of our watery world through a pair of Costas:

THANK YOU

FOR CALIFORNIA RESIDENTS:

WARNING: The products in this catalog can expose you to chemicals including nickel, which is known to the State of California to cause cancer, and bisphenol A (BPA), which is known to the State of California to cause birth defects or other reproductive harm.
